

## Profile Usage Instructions

### Red River Premium Matte Family Epson 2200

Thank you for using Red River Premium Matte.

For information on how to use color profiles, read Red River's "Color Profile Usage" and Epson's "How to use ICC profiles".

When you install the profile, it will show up in Photoshop's profile menu as:

#### **RR Premium Matte Epson 2200 1440dpi.icm**

Below are the required printer driver settings for Red River's Premium Matte/Epson 2200 profile. You must make sure all of the settings are correct to achieve optimum print quality.

<b>Parameter</b>	<b>Required Setting</b>
Paper Setting	Enhanced Matte Paper
Quality	1440dpi
Color Management	NO Color Adjustment
High Speed	OFF
Edge Smoothing	OFF
Black Ink Installed	Matte Black

#### **Special Notes:**

High Speed – Turning high speed on should not effect the color balance or quality of the image

Edge Smoothing – Like high speed, you may experiment with this setting in the ON position

If you experience "high points" in dark areas of your image – Go to the Ink Config menu screen and reduce Color Density to minus 10%. This change is usually very helpful in making dark areas more uniform.

Refer to [www.redriverpaper.com/profiles](http://www.redriverpaper.com/profiles) for any updates. Technical support for color profiles is limited to the documents included in the profiles section of [www.redriverpaper.com](http://www.redriverpaper.com)
