

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Printer: Epson Stylus Pro 3800

Driver / Printer Properties Setting Recommendations

Mode: Off No Color Adjustment

Print Quality: Quality Options / Level 4 (1440x720) – High Speed optional

Some Hints

The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color-management process.

Turn on your printer's thick paper setting when using heavy weight papers.

- Epson Printers – Set Paper Thickness to 4
- Platen Gap – Set to Wide if you experience head strikes – black marks or scrapes on your print.
