

**Introduction**

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

**Recommended Printer Driver / Property Settings****Epson**

<b>Media Type - Pick the one you have available in your printer driver.</b>	Premium Luster Photo Paper Ultra Premium Photo Paper Luster Premium Luster Photo Paper (260)
<b>Recommended Print Quality</b>	Level 4 or 1440dpi / Photo
<b>Color Mode</b>	Off (No Color Adjustment)

**Canon**

<b>Media Type:</b>	Photo Paper Plus Glossy
<b>Print Quality:</b>	Quality Options – High Level 2
<b>Color Correction:</b>	None

**HP**

<b>Paper Type:</b>	HP Advanced Photo Papers
<b>Print Quality:</b>	Best
<b>Color Management</b>	Application Managed Colors

**Printer Driver Hints**

**The name of the paper you are using will not be listed** in the media settings drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing" feature. It can interrupt the color management process.
