

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Printer: Canon Pixma MG6820 / MG5720

Setting Recommendations

Color / Intensity Setting: Manual > Matching > None

Recommended Quality Settings for best quality and economy

Print Quality: High

Some Hints

 The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

Turn on your printer's thick paper setting when using heavy weight papers.

- Canon Printers – activate the "Prevent Paper Abrasion" setting
- www.redriverpaper.com/feed - scroll to Tip 7
