

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Printer: Canon Pro-10

Setting Recommendations

Manual Color Adjustment Matching: None

Print Quality: Custom / Set Level 2

Some Hints

 The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

THICK / HEAVY PAPERS

Prevent Paper Abrasion – This is Canon's way of saying "thick paper setting". Activating it will raise the print head slightly and help you avoid head strikes.

Single sheet path – If available, you can use your printer's single sheet specialty feed. See your manual for help with that feature.
