

## Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

**Printer:** Epson Stylus Pro P6000 and P8000

### Setting Recommendations

**Mode:** Off No Color Adjustment

### Recommended Quality Settings – for best quality and economy

**Print Quality:** Quality Options / Level 4 (SuperFine 1440x720)

**High Speed:** Off

**Edge Smoothing :** Off

**Finest Detail:** On

### Some Hints

The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

Turn on your printer's thick paper setting when using heavy weight papers.

- Epson Printers – Set Paper Thickness to the recommended setting on the next page
- Platen Gap – Set to Wide if you experience head strikes – black marks or scrapes on your print.
