

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Printer: Epson Stylus R3000

Setting Recommendations

Mode: Off No Color Adjustment

Print Quality: Quality Options / Level 4 (1440x720) – High Speed optional

Some Hints

 The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

Turn on your printer's thick paper setting when using heavy weight papers.

- Epson Printers – Set Paper Thickness to the recommended setting on the next page.
- Platen Gap – Set to Wide if you experience head strikes – black marks or scrapes on your print.

Palo Duro Baryta Fiber 300 *** See note below ***	Premium Photo Paper Semi-Gloss	Platen Gap Wide Paper Thickness 5 Color Density -8%

Handling Guides

Check our website to see if your paper has a Handling Guide. Guides contain important information and helpful tips. www.redriverpaper.com/guides

Palo Duro Baryta Fiber Notes

REDUCE COLOR DENSITY

Epson printers tend to put down a great deal of ink with the media setting required for this paper. As a result, with large sheets with full coverage you may see slight ripples.

You can avoid this issue by reducing Color Density. We recommend starting at minus 8 and go now lower than minus 15. See below for how to adjust this setting.

Set the Platen Gap and Paper Thickness per our recommendation. It is important to avoid head strikes and streaking in the print.

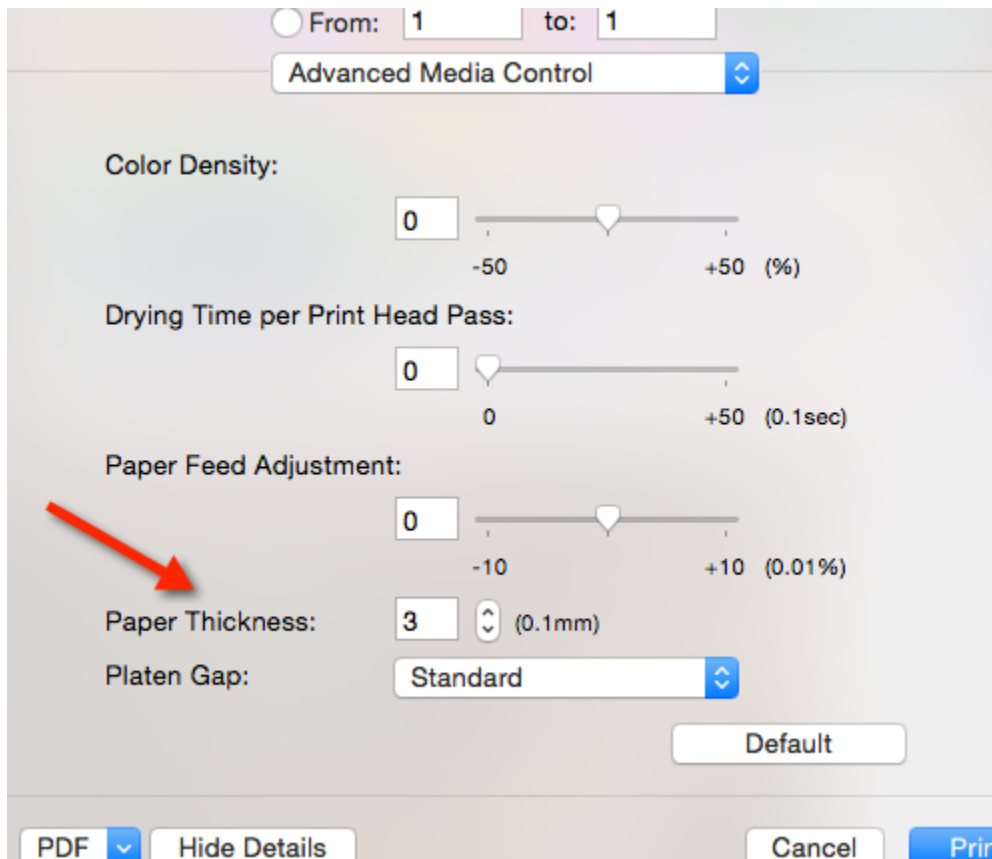

Remember!

Just like darkroom paper, Palo Duro Baryta is a sensitive material and should be handled with care.

ADVANCED MEDIA CONTROLS

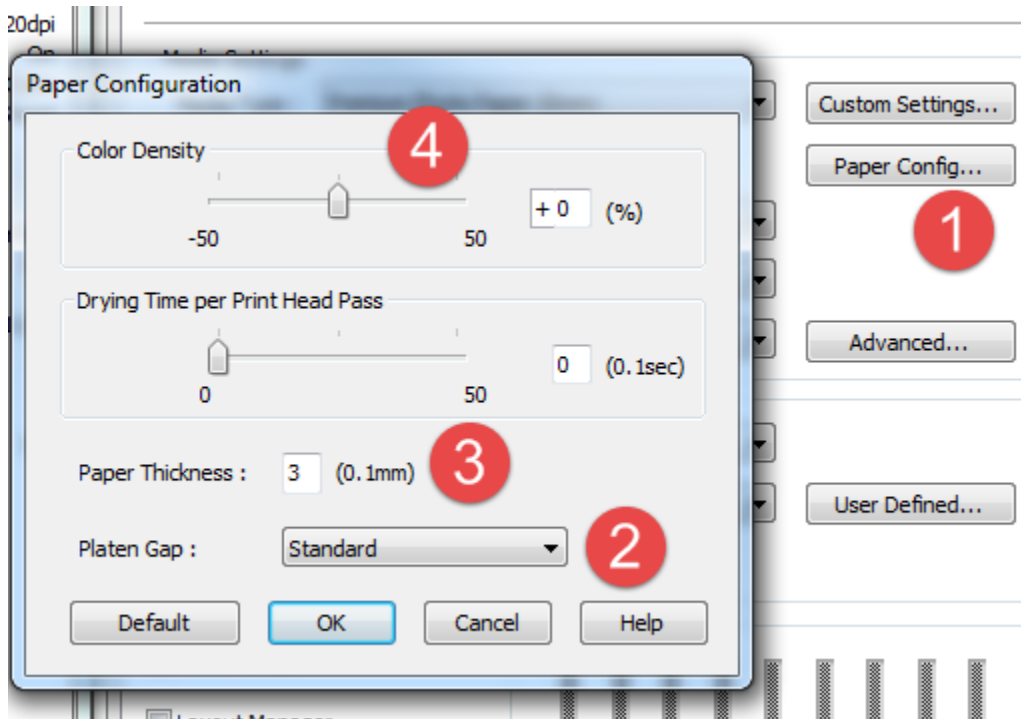

Epson includes important controls for Paper Thickness, Platen Gap, and Color Density in this menu.

Mac - From the Print menu locate the Advanced Media Control.

Windows - From the Main tab locate and click on the Paper Config (1) button.

You will find Paper Thickness (3), Platen Gap (2), and Color Density (4) controls in the Paper Configuration dialog.
