

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Paper: Palo Duro Baryta Fiber 300

Printer: Canon Prograf X100 printers

Setting Recommendations

Media Setting:	Heavyweight SemiGloss Photo Paper
Print Quality:	High
Color Controls:	Matching Mode: Off

Some Hints

Turn on your printer's Prevent Paper Abrasion feature when using heavy weight papers. Go to www.redriverpaper.com/feed for more information.

The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

More Profile Information

Go to www.redriverpaper.com/profiles for help, information, and more.
