

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Paper: 68lb. UltraPro Satin 3.0

Printer: Epson R300, R320, R340

Setting Recommendations

Media Setting:	Premium Luster Photo Paper
Print Quality:	Best Photo / SuperFine / 1440dpi
Color Correction:	Off No Color Adjustment

Printer Driver Hint

The name of the paper you are using will not be listed in the media settings drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.
