Check the profile instructions for driver settings.

### Recommended Printer Driver Settings

---

#### Epson

Premium Presentation Paper Matte or Enhanced Matte Paper

#### Canon

Matte Photo Paper

#### HP Printers

HP Premium Photo Paper

#### Lexmark

Matte Photo Paper

### Print Quality Setting Recommendations

---

#### Epson

Choose Best Photo or 1440dpi quality. Choose Photo if Best Photo is not available. We recommend avoiding Photo RPM as print quality is only marginally better while slowing your print time significantly.

#### Canon

Choose the High quality setting. On the sliding scale, you will choose 2 or 1 depending on which is the highest available.

#### HP Print Quality

Choose Best in the print quality drop down. Avoid Maximum DPI - print quality is only marginally better while slowing your print time significantly.

### High Speed Printing

---

We recommend leaving High Speed turned OFF for best possible print quality.

### Printer Color Profiles and Color Management

---

Red River Paper offers free printer color profiles for our products and many different inkjet printers. Profiles are small data files, used by software like Photoshop, that help you get better and more consistent print quality. Profiles are specific to paper, ink, and printer combinations.
