### Recommended Printer Driver Settings

#### Epson

Ultra Premium Photo Paper Luster or Premium Luster Photo Paper

#### Canon

Photo Paper Plus Semi-gloss or Photo Paper Plus Semi-gloss II

#### HP Printers

HP Premium Plus Photo Paper

#### Lexmark

Glossy Photo Paper

### Print Quality Setting Recommendations

#### Epson

Choose Best Photo or 1440dpi quality. Choose Photo if Best Photo is not available. We recommend avoiding Photo RPM as print quality is only marginally better while slowing your print time significantly.

#### Canon

Choose the High quality setting. On the sliding scale, you will choose 2 or 1 depending on which is the highest available.

#### HP Print Quality

Choose Best in the print quality drop down. Avoid Maximum DPI - print quality is only marginally better while slowing your print time significantly.

### High Speed Printing

We recommend leaving High Speed turned OFF for best possible print quality.

### Printer Color Profiles and Color Management

Red River Paper offers free printer color profiles for our products and many different inkjet printers. Profiles are small data files, used by software like Photoshop, that help you get better and more consistent print quality. Profiles are specific to paper, ink, and printer combinations.
