Epson

Choose Best Photo or 1440dpi quality. Choose Photo if Best Photo is not available. We recommend avoiding Photo RPM as print quality is only marginally better, while slowing your print time significantly.

Canon

Choose the High-Quality setting. On the sliding scale, you will choose 2 or 1 depending on which is the highest available.

HP Print Quality

Choose Best in the print quality drop down. Avoid Maximum DPI - print quality is only marginally better while slowing your print time significantly.

High Speed Printing

We recommend leaving High Speed turned OFF for best possible print quality.
