

## Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

**Printer:** Epson 1430

### Setting Recommendations

**Manual Color Adjustment Matching:** Off No Color Adjustment

**Print Quality:** Best Photo (1440dpi) recommended for most print jobs

## Some Hints

The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

Turn on your printer's [thick paper setting](#) when using heavy weight papers.
