

For information on how to use color profiles, read Red River's "Color Profile Usage" and Epson's "How to use ICC profiles". These are available for download at www.redriverpaper.com/profiles

When you install the profile, it will show up in Photoshop's profile menu as:
RR Arc Pol Gloss Ep4000.icc

Below are the required printer driver settings for this profile. You must make sure all of the settings are correct to achieve optimum print quality.

Parameter	Required Setting
Paper Setting	Premium Luster Photo Paper
Quality	Superfine – 1440dpi
Color Management	Off (No Color Adjustment)
High Speed	OFF
Edge Smoothing	OFF

Advanced

Media Type

Premium Luster Photo Paper

Ink

☒ Color/B&W

☐ Black

Print Quality

SuperFine - 1440dpi

☒ MicroWeave

☐ Super(x)

☐ High Speed

☐ Flip Horizontal

☐ Finest Detail

☐ Edge Smoothing

Save Settings...

OK

Cancel

Help

Printer Color Management

☐ Color Controls

☐ PhotoEnhance

☒ Off (No Color Adjustment)

☐ ICM

NOTE!

We use the Luster setting because the Premium Glossy Photo Paper setting will force you to use the manual feed only.

Special Notes:

High Speed – Turning high speed off should not effect the color balance or quality of the image

Edge Smoothing – Like high speed, you may experiment with this setting in the ON position

Refer to www.redriverpaper.com/profiles for any updates. Technical support for color profiles is limited to the documents included in the profiles section of www.redriverpaper.com
