

## **Printer Color Profile Instructions**

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

**Printer:** Epson Stylus Photo R1900

### **Setting Recommendations**

**Mode:** Off No Color Adjustment

**Print Quality:** Quality Options / Level 4 (1440x720) – High Speed optional

### **Support**

How to install profiles

### **Some Hints**

 The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

Turn on your printer's thick paper setting when using heavy weight papers.

Platen Gap – Set to Wide if you experience head strikes – black marks or scrapes on your print.
