

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Printer: Canon Pro9000 / Pro9000 MkII

Setting Recommendations

Manual Color Adjustment Matching: None

Print Quality: Custom / Set Level 2

Support

How to install profiles

www.redriverpaper.com/installprofiles

How to use profiles

www.redriverpaper.com/useprofiles

Some Hints

The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers.

Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

THICK / HEAVY PAPERS

Prevent Paper Abrasion – This is Canon's way of saying "thick paper setting". Activating it will raise the print head slightly and help you avoid head strikes.

Single sheet path – If available, you can use your printer's single sheet specialty feed. See your manual for help with that feature.

MEDIA SETTING RECOMMENDATIONS

Paper	Media Setting	Special
UltraPro Gloss 2.0	Photo Paper Plus Glossy II	
Polar Metallic Papers	Photo Paper Plus Glossy II
