

Printer Color Profile Instructions

Color profiles are data files that contain a description of how a particular paper, ink, and printer create all colors, shades, and densities. Using a profile will result in more accurate and consistent output.

Printer: Epson SureColor P700 & P900

Setting Recommendations

Mode: Off No Color Adjustment

Print Quality: Quality Options / Level 3 (1440x1440) – High Speed optional

Some Hints

 The name of the paper you are using will not be listed in the media setting drop down menu in the printer driver. That menu only has the names of manufacturer papers unless you also install the EMY2 files, see below.

 Do not use the printer driver's "Preview before printing feature". It can interrupt the color management process.

MEDIA SETTING RECOMMENDATIONS

 **THICK PAPER NOTE** – Products designated as “Thick Paper” (see Special column on next page) require your attention. For 8x10 and larger, use the Front Paper Feed. Smaller sizes must go through the Rear Paper Feeder with the Thick Paper setting active. See our [P700 guide](#) for more.

 **EMY2 FILES** – EMY2 stands for Epson Media Files. With newer Epson printers, important information such as paper thickness, platen gap, drying time, and more. These important controls used to be available in the printer driver menus. Now, they are contained in these EMY2 files and are activated when you choose them as a Media Type. [READ THIS EMY FILE EXPLANATION](#) - **Note that these require using Version 2 of Epson Media Installer.** If you have trouble installing EMY2 files, ensure that you are using Epson Media Installer Version 2.
